- b. No change since year-end 2011.
- c. No change since year-end 2011.
- d. Loan-Backed Securities:
 - (1) The Company uses a proprietary model for loss assumptions and widely accepted models for prepayment assumptions in valuing mortgage-back and asset-backed securities with inputs from major third party data providers. It combines the effects of interest rates, volatility, and pre-payment speeds based on various scenario (Monte Carlo) simulations with credit loss analysis and resulting effective analytics (spreads, duration, convexity) and cash-flows on a monthly basis. Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.
 - (2) An OTTI is recognized on any security whose market value is less than its amortized cost because the Company may not have the ability to hold the security for a period of time sufficient to recover the amortized cost basis.
 - (3) The Company does not have investments where an OTTI was recognized to the discounted cash flows because the company does not expect to recover the amortized cost basis of the investment.
 - (4) The Company does not have investments held showing Unrealized Losses - Greater and Less than 1 year.
 - (5) There are a number of factors that are considered in determining if there is not an other-than-temporary-impairment on an investment, including but not limited to, debt burden, credit ratings, sector, liquidity, financial flexibility, company management, expected earnings and cash flow stream, and economic prospects associated with the investment.
- e. No change from year-end 2011.
- f. The Company recognized no additional real estate impairment losses since year-end 2011.

NOTES TO FINANCIAL STATEMENTS

20. Fair Value Measurements

A. The Company had the following assets measured at fair value:

(1) The fair value hierarchy that prioritizes the inputs to valuation methods used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported with little or no market activity).

(2) Fair Value Measurements in (Level 3) of the Fair Value Hierarchy

Description	Beginning Balance at 3/31/2012	Transfer into Level 3	Transfers out of Level 3	Total gains and (losses) included in Net Income	Total gains and (losses) included in Surplus	Purchases	Issuances	Sales	Settlements	Ending Balance at 6/30/2012
a. Assets:										
Industrial & Misc.	-	-	-	1	353	599,951	-	-	-	600,305
Total Assets	-	-	-	1	353	599,951	-	-	-	600,305
b. Liabilities:										
-----	-	-	-	-	-	-	-	-	-	-
Total Liabilities	-	-	-	-	-	-	-	-	-	-

(3) Investments that are required to be carried at fair value are measured based on assumptions used by market participants in pricing the security. The most appropriate valuation methodology is selected based on the specific characteristics of the fixed maturity or equity security, and the Company consistently applies the valuation methodology to measure the security's fair value. Fair value measurement is based on a market approach, which utilizes prices and other relevant information generated by market transactions involving identical or comparable securities. Sources of inputs to the market approach include third-party pricing services, independent broker quotations or pricing matrices. Observable and unobservable inputs are used in the Company's valuation methodologies. Observable inputs include benchmark yields, reported trades, broker-dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data. In addition, market indicators, industry and economic events are monitored and further market data is acquired if certain triggers are met. For certain security types, additional inputs may be used, or some of the inputs described above may not be applicable. For broker-quoted only securities, quotes from market makers or broker-dealers are obtained from sources recognized to be market participants. In order to validate the pricing information and broker-dealer quotes, the Company relies on, where possible, procedures that include comparisons with similar observable positions, comparisons with subsequent sales, discussions with senior business leaders and brokers and observations of general market movements for those security classes. For those securities trading in less liquid or illiquid markets with limited or no pricing information, unobservable inputs are used in order to measure the fair value of these securities. In cases where this information is not available, such as for privately placed securities, fair value is estimated using an internal pricing matrix. This matrix relies on judgment concerning the discount rate used in calculating expected future cash flows, credit quality, industry sector performance and expected maturity.

(4) Prices received from third parties are not adjusted; however, the third parties' valuation methodologies and related inputs are analyzed and additional evaluations are performed to determine the appropriate level within the fair value hierarchy.

The observable and unobservable inputs to the Company's valuation methodologies are based on a set of standard inputs that are generally used to evaluate all of our available-for-sale securities. The standard inputs used are benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data. Depending on the type of security or the daily market activity, standard inputs may be prioritized differently or may not be available for all available-for-sale securities on any given day. A. The Company did not have any assets measured at fair value on a recurring basis

B. The Company did have not any assets measured at fair value on a nonrecurring basis.

C. The Company had the following assets measured at fair value for all types of financial instruments:

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Not Practicable (Carrying Value)
Assets
